

DEKO

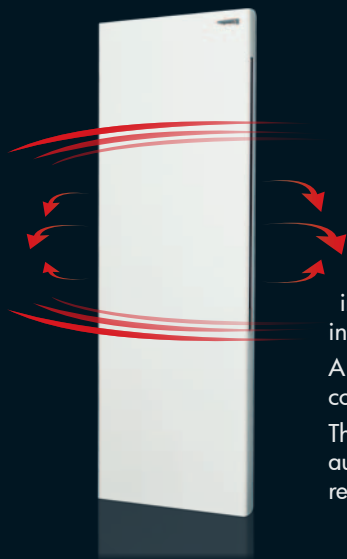

Its vertical, clean, elegant lines will catch your eye immediately

Enhanced with a ground stone-like surface, the DEKO electric radiator is characterised by its slender shape, just 43 cm wide, 120 cm high, and 8 cm thick, perfectly proportioned to make it a great design piece, with an aesthetic impact, in your home.

DEKO is not just a radiator with a sophisticated design, above all it is about modern technology at your service. The DUAL-THERM infrared red radiation and natural convection heating system, will be able to give a heating sensation beyond compare, that is long-lasting, pleasing, and embracing.

Heating Style

DEKO contains DUAL-THERM technology, that is, two different heating systems in a single product: An aluminium element makes it possible to reach the required comfort level in the room quickly, as well as reacting quickly to fluctuations in temperature.

A radiant element ensures that the front surface transmits constant, even heat, by radiation.

The electronic thermostat provides intelligent heat management, automatically reducing consumption when the temperature reaches the required level.

Features

- Ultra-thin vertical design – only 8 cm in thickness
- DUAL-THERM double-heating system
- Energy saving technology for the optimization of consumption
- High precision electronic thermostat
- Weekly programming with ZEFIRO remote control (optional)
- Quick and easy installation, thanks to the provided assembly kit, and no maintenance costs
- 5 different function modes
- IP24 protection against bursts of water, ideal for installation in wet spaces

Control System

Multi-Purpose Electronic Control System for the Precise Regulation of Comfort

1-ON/OFF switch 2-LED indicator 3-environment thermostat
4-function mode selectors (COMFORT, ECO, FREEZING PREVENTION, STAND BY, PROGRAMMED)

ZEFIRO programmer (seen here at the side, optional) allows for the regulation of temperature to a tenth of a degree and for the programming of the radiator for an hourly, daily, or weekly schedule

Data

DEKO is available in the 1000W version

DEKO	
Ean Code	8019250987650
Dimensions in cm. (W x H x D)	43 x 120 x 8
Power @ 230V	1000W
Overall thickness product installed (cm.)	9
Electronic thermostat	•
Net Weight (Kg)	14
Color	White
