

# ACANTO & HELISEA

A new way of diffusing heat in your bathroom -  
environment-friendly and low energy consumption

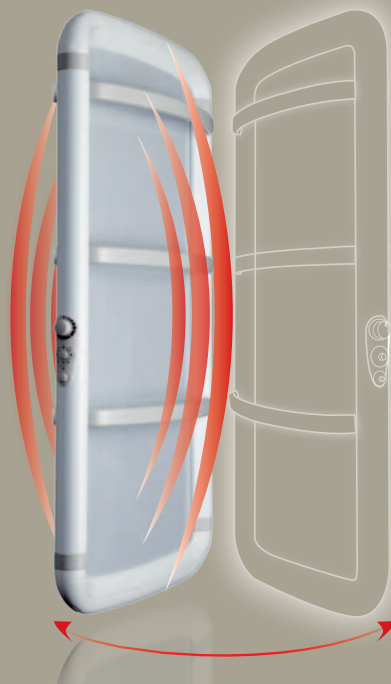

ACANTO & HELISEA are the Radialight® towel heating radiators which guarantee heat emission in an even and all-encompassing manner. They will heat your spaces, ensuring an even temperature, in the same natural way as a ray

of sunlight, perfectly drying your towels. Light and easy to install, ACANTO and HELISEA reach their functioning temperature in just 5 to 6 minutes, giving you the immediate sensation of heat.

## Heating Style

HELISEA is the first tip-up electric radiant towel heater, with two heating surfaces. A simple movement rotates the Helisea on its wall supports, to allow both sides to be used in order to diffuse heat in all directions, or to heat the bathroom on one side, while heating towels on the other side.

ACANTO is a fixed installation unit, with a surface that is heated evenly by a low energy consumption resistance, with high heating power.

## Control System

ACANTO and HELISEA have a high precision electronic thermostat that regulates the comfort of your bathroom, and a timer with 4 settings (15'-30'-60'-120') for timed usage.

## Features

- DHS (Diffused Heat Technology) for the uniform distribution of heat across all the heating surface of the product with the ample spreading of heat rays
- Power: 300W (ACANTO 70 - HELISEA 70 models) /450W (ACANTO110 - HELISEA 110 models)
- Electronic thermostat with a freezing-prevention setting
- 4 position timer (15' - 30' - 45' - 60')
- Double electrical insulation
- IP24 protection against bursts of water, ideal for installation in wet places
- Colour: white

## Data

ACANTO and HELISEA are available in 2 different versions:

- 110: 450W, ideal for bathroom up to 5m<sup>2</sup>
- 70: 300W, ideal for bathroom up to 3m<sup>2</sup>
