

STYLO

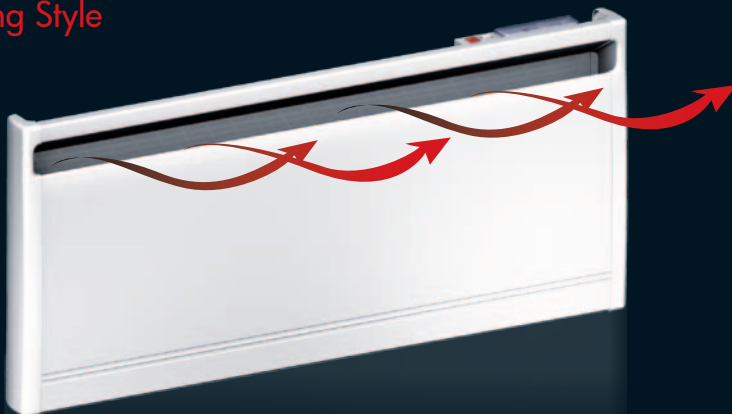

Technology: economy and efficacy with cutting-edge design

The STYLO range of convection heaters provides the most simple and economical solution to domestic heating, while decorating your home with their modern design. The inner aluminium heating core provides all the heat necessary to reach the required temperature as quickly as possible and, when combined with an electronic thermostat, STYLO is able to maintain the comfort level you want, with absolute, long-lasting precision.

The units are light-weight and easy to install, thanks to the complete kit that comes with each product. In less than 15 minutes you can benefit from the warm embrace offered by STYLO, without any building works and invasive electrical connections.

Heating Style

STYLO will heat your home using natural convection - the cold air passes through the lower grille, is heated by the aluminium coil, and comes out of the grille at the top, heating your domestic environments perfectly, in complete safety and without any noise, as there are no moving mechanical parts.

The electronic thermostat provides intelligent heat management, automatically reducing consumption when the temperature reaches the required level.

Features

- Electric Convector slim design - only 7,5 cm thick, that ensure quick, uniform heating of the space
- Maximum silence - no moving mechanical parts (fan or motors) included
- Energy-saving technology with consumption optimisation
- Provision for weekly programming, using an infrared module and the ZEFIRO programming timer (optional extras)
- Easy, quick installation using the built-in assembly kit, and zero maintenance costs
- IP24 protection against sprayed water, ideal for installation in wet spaces as well

Control System

A

B

Each STYLO version has the following:

1 - LED indicator / 2 - environment thermostat with a minimum (7°C) freezing-prevention setting / 3 - on/off switch

Optional for STYLO timer programming:

A - STYLO REMOTE IR Module: a weekly programming receiver (to be installed on each heater)

B - ZEFIRO remote control: to provide easy and user-friendly programming (a single timer programme which permits the programming of all the STYLOs installed in your home)

Data

The STYLO range is available in 4 different models – from 500W, 1000W, 1500W, to 2000W – whose size and power are designed to meet the needs of every home environment

Model	STYLO 5	STYLO 10	STYLO 15	STYLO 20
Ean Code	8019250990506	8019250991008	8019250991503	8019250992005
Dimensions in cm. (W x H x D)	47 x 41 x 7,5	71 x 41 x 7,5	96 x 41 x 7,5	116 x 41 x 7,5
Power @ 230V	500W	1000W	1500W	2000W
Overall thickness product installed (cm.)	11,5	11,5	11,5	11,5
Electronic thermostat	•			
Net Weight (Kg)	3,90	5,65	7,15	8,60
Color	White			

Optional weekly programming is available through STYLO REMOTE IR receiver module and ZEFIRO remote control
